

Network and Information System Management Team Project Evaluation

By Team 3 (Kikelomo Obayemi, Suresh Sigera, Japhet Ndhlovu)

Date: 30 October 2021

Project: Conduct a Penetration Test on a Client Website.

Goal:	Evaluation	Rating			Score
		Beat	Met	Didn't	
Conduct a Penetration Test on client's website to reveal security vulnerabilities and make appropriate recommendations		50	30	10	42
Objectives: Learn the use of penetration testing tools	Team members were able to learn how to use all penetration testing tools (Nmap, MSF, OWASP ZAP, Kali Linux) mentioned in the proposal.	Beat 10	Met 6	Didn't 2	
Perform vulnerability scans using appropriate tools and standard methodology	A high-level vulnerability check was also included to highlight other non-technical issues such as business processes and threat agents.	Beat 10	Met 6	Didn't 2	
Produce findings and recommendations in an Executive Report	This objective was met with a very lean workforce. Team members took on additional tasks than originally planned.	Beat 10	Met 6	Didn't 2	
Evaluate client site's compliance to global standards.	Client's site was evaluated to determine compliance with PCIDSS and GDPR.	Beat 10	Met 6	Didn't 2	

Deliver project by October 25, 2021 2359hrs	Project was delivered before the deadline	Beat	Met	Didn't	
		10	6	2	
TOTAL:					84 out of 100
