

## Feedback for RRMP Literature Review [Formative]

<b>Tutor completing formative feedback:</b> Karen Outram	<b>Student number:</b> Kikelomo Obayemi
<b>Details of any extensions etc:</b>	<b>Submission Attempt:</b> Formative

Your literature review formative content is very concise and the content is laid out to a very good standard both from the perspective of a professional structure as well as from an academic conventions perspective.

The content overall is laid out to an excellent standard. You have used the correct font and line spacing and your paragraphs are well thought through.

You cite regularly from cross sectional resources, and there is a supporting reference list at the end of the formative discussion. For your final summative make sure your reference list is on its own page.

The intended subject matter of the final summative is interesting and it is clear from the manner in which the literature review formative is written that you have considered how you want to shape this piece of work and what it will entail.

There is surety in the manner in which you write and your sentence structure and syntax is strong. My overall advice is to take this same approach for your final summative. Also for the final summative ensure that the debate and discussion in the final piece is strong.

With best wishes

Karen Outram
