

Formative activities

OS investigation. Select an operating system of your choice and then perform the following functions: **MacOS Catalina**

- Investigate the features that OS offers by visiting 'Preferences' sections of your OS setting.
- Open a new folder. **Test**
- Create a file and store the file in the previously created folder. **File**
- Rename the folder that you create. **Test1**
- Rename the file you created. **File1**
- Check the properties of the newly opened folder and the file.

My Findings

The Operating System keeps a record of everything that has been done on the file.
